

CEMB[®] U S A
WHEEL SERVICE EQUIPMENT

DWA1100CWAS

A perfect package for portability or for shops starting out with low volume alignment service who wish to avoid the investment cost of an alignment rack. Portable wheel stands allow use on a two-post lift in virtually any work bay. Optimal for small repair shops or even frame benches in heavy-hit collision shops. Also works well as a back up alignment system to handle over-flow alignment service all across the shop.
