ARGOS X

A NEW ERA

ARGOS X marks a new era: a blend of innovation, accuracy, and sleek design. The product results from 20 years of research and a decade of field experience, redefining standards of speed, dependability, and simplicity in wheel alignment.

5"

Measure toe and camber in less than 5 seconds

Contactless; nothing attaches to wheels

For all passenger and light-duty vehicles

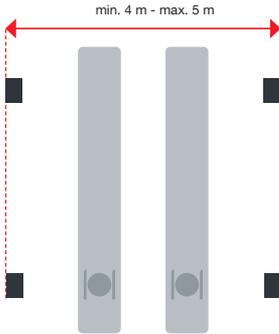

No moving parts, fits around your working space without interference

Automatic calibration; no need for periodic checks

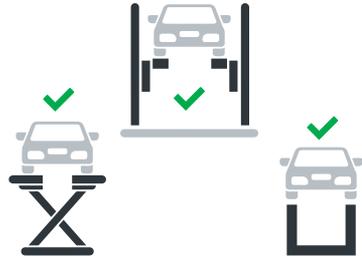

MAXIMUM ADAPTABILITY

ARGOS X can be adapted to any workspace without interference for a simplified installation.

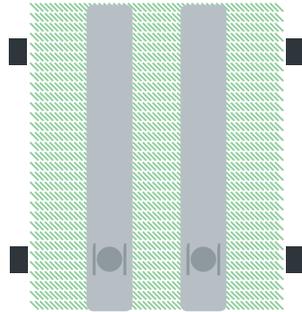

Can be used in workshops of any size

Suitable for any existing lift or pit, without additional installations

Always accurate measurements even with lift not perfectly levelled

No moving parts, no interference in the working area

FULL VERSION

Measure vehicles on the floor for the reception lane and adjust them on a lift at a fixed height

STEP-BY-STEP INNOVATION

1 GUIDED Positioning

Upon vehicle arrival,
video starts to guide its positioning
on the turnplates

2 CONTACTLESS measurement

No clamps, targets
or sensors to be attached

3 IMMEDIATE results

Toe and Camber
measured in less than **5 seconds**

Rim run-out
not mandatory

5"

4 Turnplates with AUTOMATIC LOCKING/ UNLOCKING (option)

When steering, turnplates automatically unlock and Caster measurement begins.

No brake pedal required

5 FAST PRESELECTION of specs

Make and model list is automatically shortened based on vehicle size

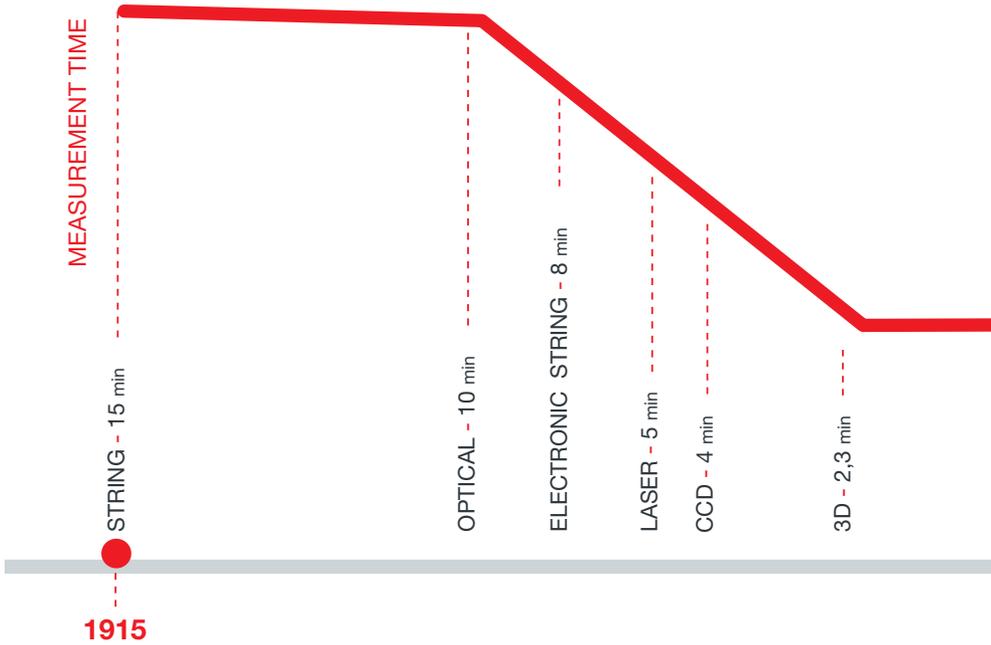

6 REPORT and sharing

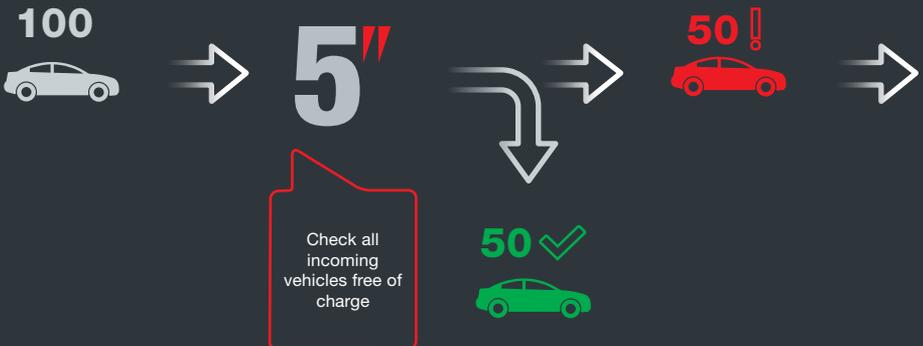

A complete report visualizes vehicle issues resulting from out-of-specs measurements to support the sale of the adjustment service

100 years of speed improvement for toe and camber measurements

ARGOS X: INCREASE YOUR BUSINESS!

10 years of worldwide experience on the field
