ARGOS X

marks a new era: a combination of innovation, precision and compact design. The result of 20 years of research and 10 years of field experience, it redefines the standards of speed, reliability and simplicity in wheel alignment.

ARGOS X

A NEW ERA

5"

Measure toe and camber in less than 5 seconds

Contact less; nothing attaches to wheels

For all passenger and light duty vehicles

No moving parts, fits around your working space without interference

Automatic calibration; no need for periodic checks

STEP-BY-STEP INNOVATION

1 GUIDED Positioning

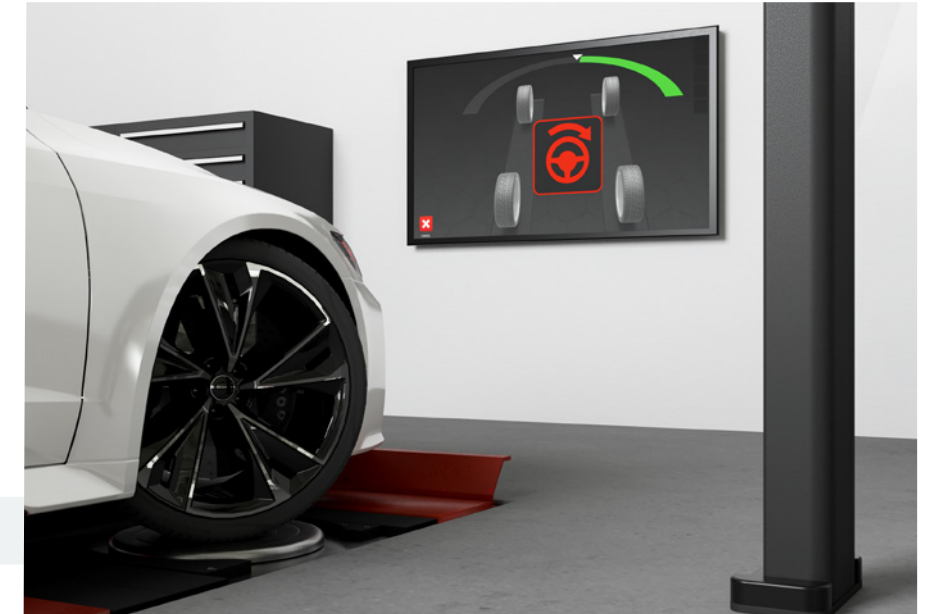

Upon vehicle arrival, video starts to guide its positioning on the turnplates

4 Turnplates with AUTOMATIC LOCKING/ UNLOCKING (option)

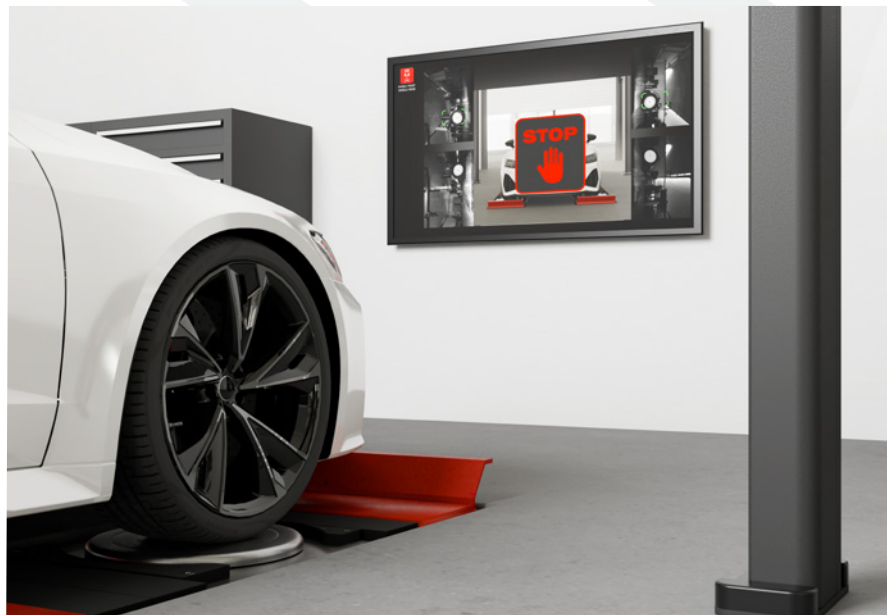

When steering, turnplates automatically unlock and Caster measurement begins.

No brake pedal required

2 CONTACT LESS measurement

No clamps, targets or sensors to be attached

5 FAST PRESELECTION of specs

Make and model list is automatically shortened based on vehicle size

3 IMMEDIATE results

Toe and Camber measured in less than 5 seconds

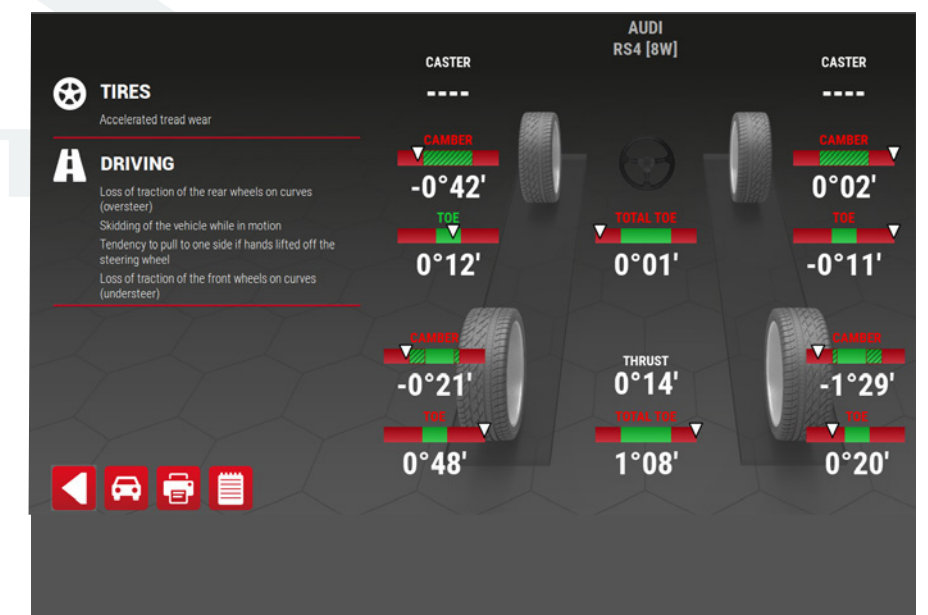

Rim run-out not mandatory

5"

6 REPORT and sharing

A complete report visualizes vehicle issues resulting from out-of-specs measurements to support the sale of the adjustment service

LOGICIELS PACKAGES

GOLD

Database license

Automatic updates of vehicle specifications in real time

Automatic software updates

Sends results in real time via WhatsApp, Email or SMS

APP for full control from tablet or smartphone

Remote Assistance

DMS connection via Workshop.net

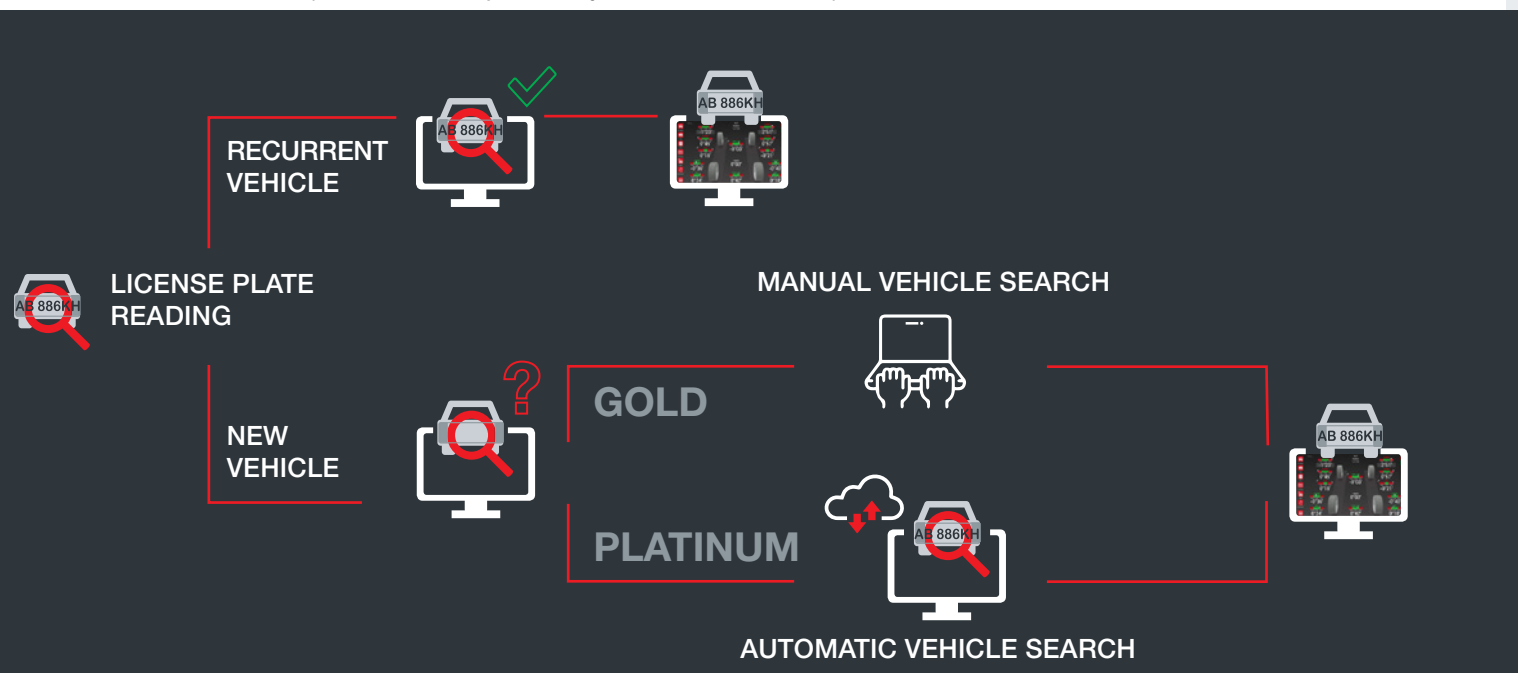

Automatic recognition of vehicle specifications from recurrent vehicle license plate reading

PLATINUM

IN ADDITION TO THE GOLD PACKAGE:
Automatic recognition of specifications from new vehicle license plate reading. Useful to cancel operator time and doubts looking through vehicle model list (*available as option only for some countries).

RESULTS ALWAYS AT HAND

Offer your customers a modern experience by sharing alignment reports directly to their smartphone or tablet.

Use the clarity and objectivity of reports to promote the alignment adjustment service!

CEMB APP

App for full control from tablet or smartphone to ease checking measurements while adjusting under the vehicle and selecting specs from inside the vehicle

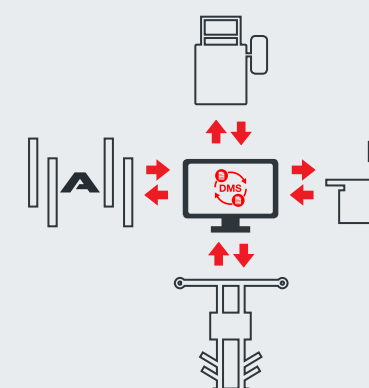

CLOUD SERVICES

Real-time access to:

- Automatic software releases so that you are always updated with the newest features
 - Database updates to always have newest vehicles specs
- Enabled to receive:
- Remote support, for effective and low-cost troubleshooting

WORKSHOP.NET

ENHANCED PRODUCTIVITY

Integrate 'Workshop-Net' framework to automate work orders and results data exchange with shop data management system (DMS) for enhancing productivity.

WORKSHOP-NET: improve planning and increases profitability.

MAXIMUM ADAPTABILITY

ARGOS X can be adapted to any workspace without interference for a simplified installation.

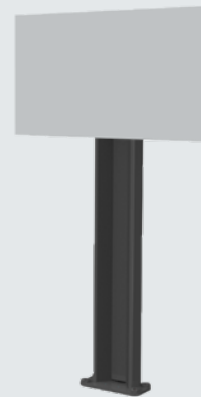

Measure vehicles on-floor for reception lane and adjustment on a lift at a fixed height

OPTIONAL ACCESSORIES

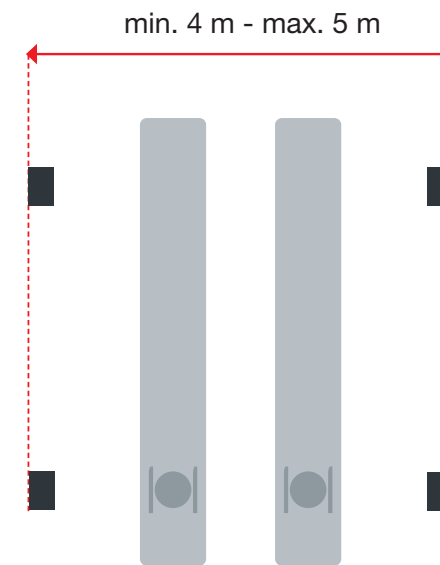

AUTOMATIC LOCKING/UNLOCKING TURNPLATES
for quick caster check without exiting the vehicle

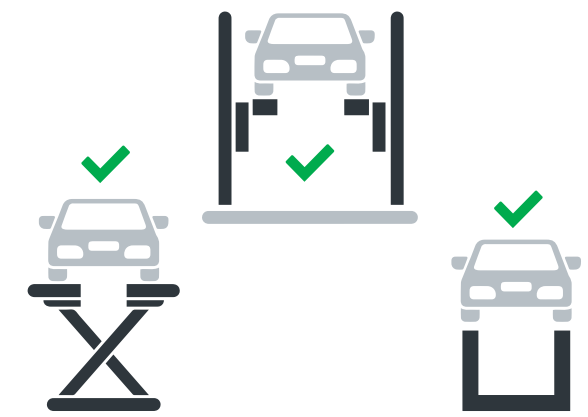

MONITOR SUPPORT COLUMN

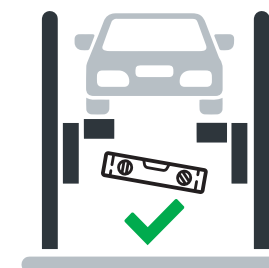

*GOLD package included free of charge for 1 YEAR

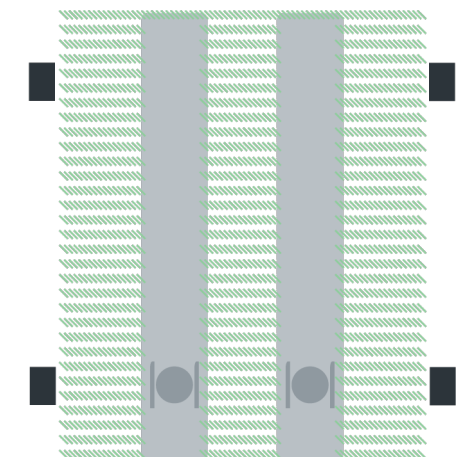

Can be used in workshops of any size

Suitable for any existing lift or pit, without additional installations

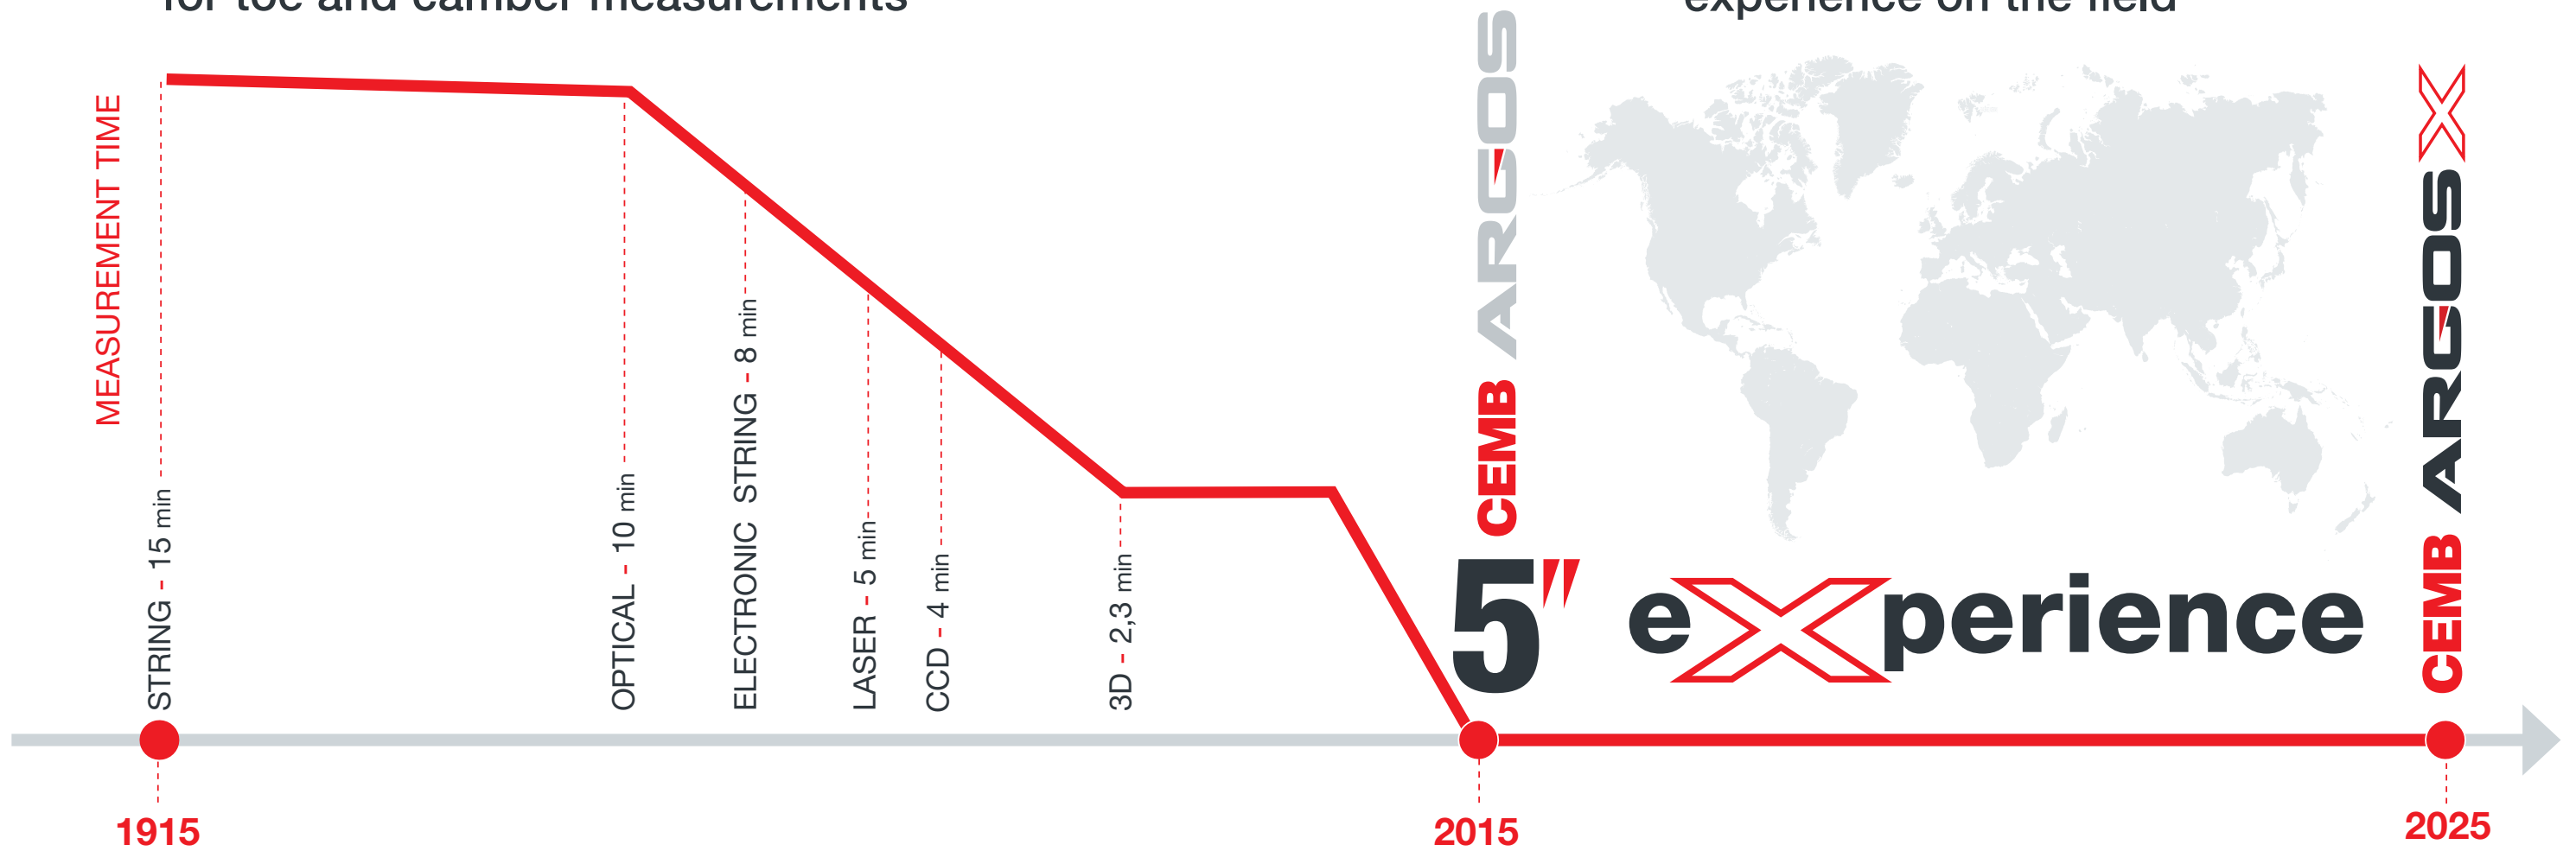

Always accurate measurements even with lift not perfectly levelled

No moving parts, no interference in the working area

100 years of speed improvement for toe and camber measurements

10 years of worldwide experience on the field

ARGOS X: INCREASE YOUR BUSINESS!
